

Green Chili and Other Impostors: A Food Story That Will Make You Question Everything You Thought You Knew

We all know that green chili is green. But what if I told you that it's not really green? In fact, most green chilies are actually red. The green color comes from a chemical reaction that occurs when the chili is exposed to sunlight.

This is just one of the many surprising and fascinating stories that you'll find in *Green Chili and Other Impostors*. This book is a food story that will make you question everything you thought you knew about food.

From the chocolate that isn't really chocolate to the fish that isn't really fish, this book is full of stories about the food we eat. You'll learn about the history of food, the culture of food, and the science of food. And you'll never look at your food the same way again.

Here are just a few of the impostors that you'll meet in this book:

- The green chili that isn't really green
- The chocolate that isn't really chocolate
- The fish that isn't really fish
- The cheese that isn't really cheese
- The butter that isn't really butter

These are just a few of the many impostors that you'll find in this book. So if you're ready to learn the truth about food, then pick up a copy of *Green Chili and Other Impostors* today.

You won't be disappointed.

Praise for *Green Chili and Other Impostors*

"A fascinating and entertaining look at the hidden world of food. I learned so much from this book, and I'm sure you will too." -Marion Nestle, author of *What to Eat*

"A must-read for anyone who loves food. This book will change the way you think about the food you eat." -Mark Bittman, author of *How to Cook Everything*

"A delightful and informative read. I highly recommend this book to anyone who is interested in food." -Harold McGee, author of *On Food and Cooking*
