Guздial is a professor of computer science at the University of Michigan and a leading expert on artificial intelligence (AI) and machine learning. He has spent years developing and testing educational robots, and he has seen firsthand the transformative power of this technology.

In My Teacher Is Robot, Guздial lays out a vision for the future of education that is both ambitious and achievable. He argues that robots can help us to:

- Personalize learning for every student
- Provide real-time feedback and support
- Create more engaging and interactive learning experiences
- Make education more accessible and affordable

Guzdial does not believe that robots will replace human teachers. Instead, he sees them as a valuable tool that can help teachers to do their jobs more effectively. Robots can take care of the repetitive and mundane tasks, such as grading papers and providing feedback, so that teachers can focus on what they do best: inspiring and motivating students.

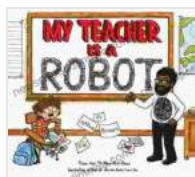

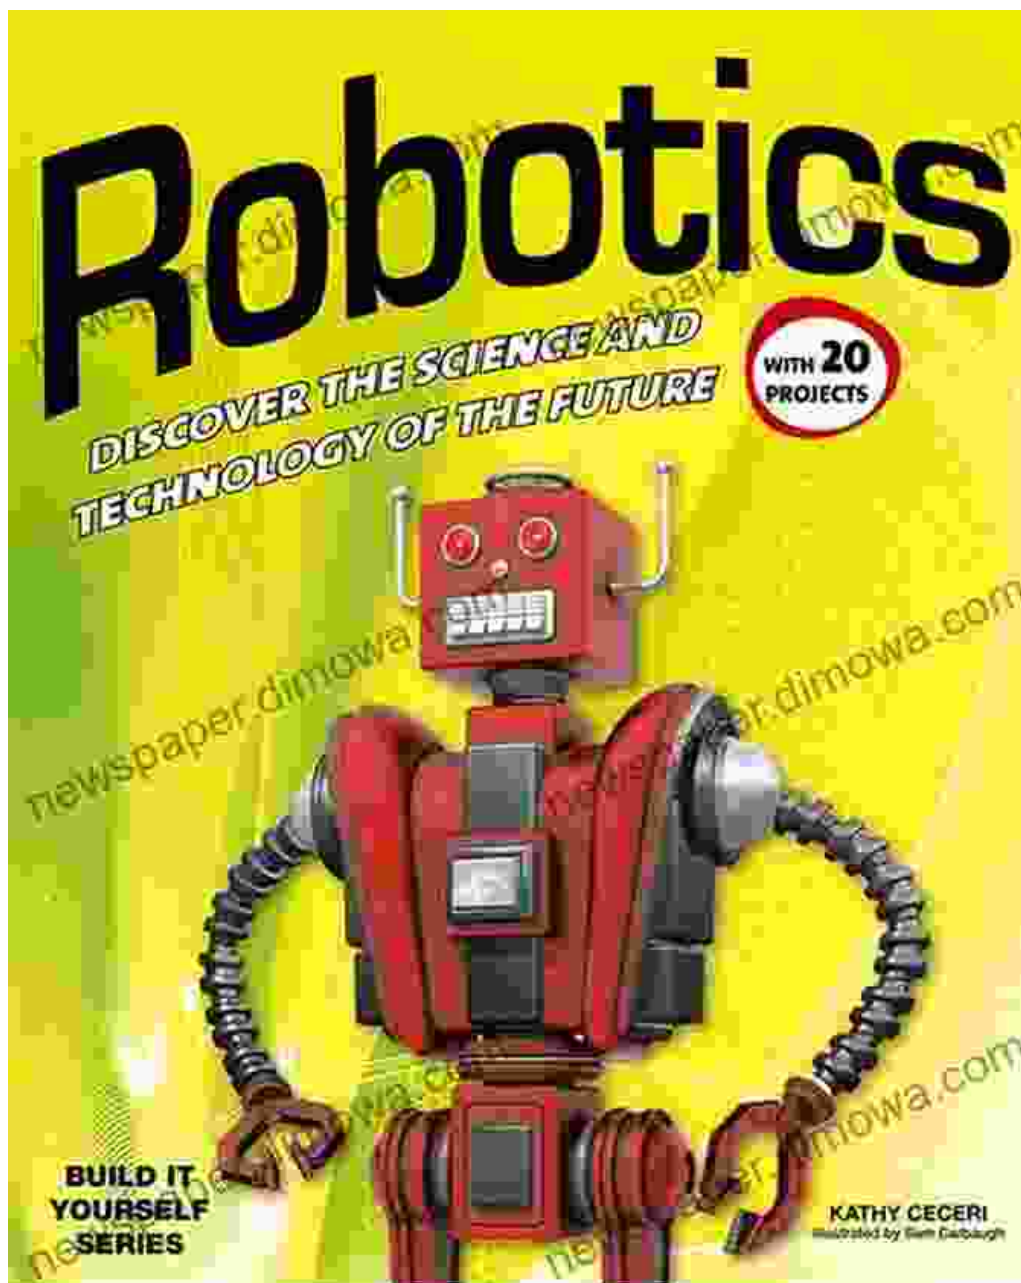

My Teacher Is Robot is a must-read for anyone who is interested in the future of education. Guzdial's insights are both thought-provoking and practical, and he provides a clear roadmap for how we can use robots to create a more equitable and effective education system for all.

Here are some of the key takeaways from *My Teacher Is Robot*:

- Robots are already being used in schools today, and their use is only going to increase in the years to come.
- Robots can provide a number of benefits for students, including personalized learning, real-time feedback, and more engaging learning experiences.
- Robots can help teachers to do their jobs more effectively by taking care of the repetitive and mundane tasks.
- Robots will not replace human teachers, but they will become a valuable tool that can help teachers to create a more equitable and effective education system for all.

If you are interested in learning more about the future of education, I highly recommend reading *My Teacher Is Robot*. Guzdial's insights are both thought-provoking and practical, and he provides a clear roadmap for how we can use robots to create a better future for all students.
